SUMMARY

Amazon Economist specializing in Causal Inference, Machine Learning, Econometrics, and Bayesian Statistics
4 years of industry experience using analytics to solve business problems, coding (Python, R, SQL), and statistical analysis

TECHNICAL SKILLS

Causal Inference & Experimentation: A/B Testing, Observational Study Designs, Instrumental Variable (IV), Diff-in-Diff, Regression Discontinuity (RD), Double ML, Synthetic Control, Propensity Score Matching (PSM), Policy Impact Evaluation
Data Modeling & Machine Learning: Bayesian Statistics, Time-Series Analysis, Random Forests, Support Vector Machines, Lasso/ElasticNet Regression, Clustering (K-Means, GMM)
Certifications: Financial Risk Manager (**FRM**) – Both Levels, Chartered Financial Analyst (**CFA**) – Level I
Programming & Data Tools: Python, Spark, SQL, R, MATLAB, STATA, Stan, SurveyCTO, ODK, Git, L^AT_EX

INDUSTRY EXPERIENCE

Economist II Jun. 2025 – Present
Amazon.com, Inc. New York, New York

- Architected causal validation pipelines for a full-funnel ads measurement platform underpinning \$50B in annual ad spend
- Advanced the intersection of generative AI and causal inference to improve ad measurement precision and scalability
- Implemented causal frameworks to quantify and validate incremental lift across Amazon's suite of global ad products

Economist Aug. 2021 – Sep. 2024
CGIAR International Livestock Research Institute (ILRI) Nairobi, Kenya

- Led 4 large-scale causal inference studies impacting 6,000+ smallholder farmers across 120+ Kenyan dairy cooperatives
- Developed a digital credit scoring model using logistic regression, leveraging transaction histories and farm productivity data to predict loan repayment likelihood and improve financial access for smallholder farmers
- Managed an A/B testing on a Google-funded digital learning platform, evaluating the impact of in-person engagement on 4,000+ Kenyan users, increasing retention by 27%

Equity Data Analyst Jul. 2017 – Apr. 2018
Morningstar Shenzhen, China

- Analyzed annual and quarterly financial reports for 300+ publicly listed companies in North America
- Conducted financial performance assessments utilizing DCF, comparable company analysis (CCA), and regression models, resulting in 20+ data-driven investment recommendations
- Utilized SQL window functions, user-defined functions (UDFs), and self-joins to efficiently extract, clean, and analyze financial datasets from relational databases, ensuring data integrity and consistency in reporting

DATA SCIENCE PROJECTS

MilkChain | *Python, R, Stata, Machine Learning, Bayesian Models, A/B Testing* Aug. 2021 – Dec. 2024

- Led a cross-functional team of software engineers, data analysts, and field coordinators to develop a digital traceability system monitoring milk movement across 1,200+ farmers, intermediaries, and retailers in Kenya's dairy supply chain
- Designed and implemented machine learning models (Lasso, ElasticNet) in Python to predict milk quality, applying data preprocessing, feature selection, and hyperparameter tuning to optimize model performance
- Developed Bayesian hierarchical models using Markov Chain Monte Carlo (MCMC) algorithms in R, achieving 90%+ prediction accuracy on milk quality classification
- Designed and led a \$148K (independently raised from NSF, MIT/J-PAL, Weiss Fund, etc.) A/B testing project that revealed hidden milk quality information via traceability systems and Bayesian models, reducing milk adulteration by 21.9%

RainDistancing | *Python, Stata, GIS, Instrumental Variable (IV)* Apr. 2020 – Jan. 2022

- Processed and integrated large-scale geospatial datasets using QGIS and Python, analyzing mobility patterns across 1,900+ U.S. counties to assess weather-driven behavioral shifts
- Built causal inference models (Instrumental Variable) to quantify the economic and epidemiological effects of mobility changes
- Published findings in the *Journal of Health Economics* (2022), advancing evidence-based pandemic policy design

EDUCATION

University of California, Santa Cruz Santa Cruz, CA
Ph.D. in Economics, Department of Economics (GPA: 3.95/4.0) 2025

- UCSC Chancellor's Dissertation-Year Fellowship (\$54,320) – Only recipient from Economics Department in decades
- Annual Award for Excellence in Teaching

University of California, Santa Cruz Santa Cruz, CA
M.A. in Economics, Department of Economics (GPA: 3.93/4.0) 2019
Jiangxi University of Finance and Economics Jiangxi, China
B.S. in Finance, International School (GPA: 93/100, Rank: 2/557) 2017

- China National Scholarship by Ministry of Education (Awarded to top 3 among 2,300)
- CFA Program Student Scholarship by CFA Institute
